PROJECTS

CURRENT	Search Autosuggest and Recommendation App Using flask app on python and Angular created an app which manipulates its digest cycle and creates Autosuggest search box for every client website along with products Recommendations
NOV 2016	Github RepoFetch using ReactJS Using JSX Component of React and Angular components made a page which searches corresponding to a username to github API and results are displayed on page such as followers , repos ,etc
AUG 2016	Github User stat using Angular Using Ui route and oi-select made a Angular webapp for extracting complete github details of a organisation including its all data. with multiview link support
JULY 2016	Angular route validation with ui-route It is a complete webapp based on NodeJS and AngularJS having a form with validation and data redirected to same view from another file using ui-route.
APRIL 2016	Micro Social Directory using AngularJS. It is a micro social directory for the people in which website fetches data from a API and arranged them on page and when a person's id is clicked details are shown there only , website didnt get load. Which can be Seen at : http://shyam2taylor.github.io/project/
MARCH 2016	College CulturalFest website "Resurgence" It is a website which works on NodeJS , HTML , CSS ,JQuery ,PHP . All the detail regarding events , schedule, Results , Gallery are displayed there . Working of which is done on https://github.com/smvdu/Resurgence-website .
NOV 2015	College Techfest Website "Titiksha" It is a website for Jammu's largest tech fest 'titiksha' and my contribution as a lead web developer on this project can be verified at https://github.com/smvdu/Titiksha-website .
